(54) DATA PROCESSOR

(57) Abstract:

PURPOSE: To freely move a display part and to improve operability by providing the display part provided with a screen displaying a display signal from a keyboard part and an arm which connects the keyboard part to the display part and which can freely be expanded and contracted.

CONSTITUTION: In a data processor, a main body 1 is provided with the keyboard part 2 provided with a keyboard 7, the display part 3 provided with the screen 8 and the arm 6 connecting the keyboard part 2 to the display part 3. The arm 6 is provided with a hinge 4 provided in the keyboard part 2, a hinge 5 provided in the display part 3 and a connection arm which connects the hinges 4 and 5 and which can freely be expanded and contracted. Thus, the connection arm of the arm 6 can be expanded and contracted thereby the display part 3 can be moved to a place where it can easily be viewed.
